שם מוצר: מתאם בלוטות' לטלוויזיה עם שלט לעוצמת השמע

אוונטרי (יצרן) Avantree

צבע: שחור

**Type:** Bluetooth Transmitter for TV with Remote Volume Control, aptX-Adaptive & Low Latency, and Soundbar Passthrough  
**Oasis Plus 2 Producer:** Avantree **Color:** Black

## Overview:

### NO LIP-SYNC DELAYS

The Oasis Plus 2's aptX-Adaptive & aptX-Low Latency support enables high-quality audio at a low latency when used with headphones that also support one or both codecs, ensuring a perfectly synced audio & visual experience at a range of up to 164ft / 50m.

### BOOSTED VOLUMES

Transmitters connected via optical sometimes suffer from low volumes that cannot be adjusted; the Oasis Plus 2 is one of the only transmitters on the market that alleviates this by boosting the volume of optical connections by up to 6dB.

### REMOTE CONTROL

Adjust the volume of your headphones from afar with the included remote control, eliminating the need for manual volume adjustments on devices that don't have built-in volume controls, such as AirPods or other true wireless earbuds.

### UNIVERSAL COMPATIBILITY

With optical & AUX input options, the Oasis Plus 2 allows you to stream wireless audio from the majority of TVs on the market.

### PASS-THROUGH SUPPORT

The Oasis Plus 2 allows you to bypass audio so you can listen through both an external soundbar & your headphones simultaneously.

### You Should Know:

- Compatible Devices All Bluetooth headphones & earbuds, including AirPods, Bose, and more
- Low Latency Compatible Devices Avantree Aria Pro, Aria Me, Audition 3, and more, including any aptX-Adaptive or aptX-Low Latency supporting devices.
- Incompatible Devices Certain models of hearing aids, including Philips HearLink
- Note 1 Not all aptX versions support low latency. Double-check that your device supports either aptX-Adaptive or aptX-Low Latency to avoid audio delays.
- Note 2 Before pairing with the transmitter, turn off your phone's Bluetooth for best results.
- Note 3 The Oasis Plus 2 is a transmitter designed for streaming audio to Bluetooth headphones. It cannot be paired with your phone or similar.
