Type: Audikast Plus - **Bluetooth 5.0 audio transmitter** **Producer:** Avantree **Color:** Black **Overview:**

Bluetooth 5.0 audio transmitter for TV, PC with no audio delay. 100ft long range

Class 1 wireless audio adapter with direct volume control via button +/-

Dual link aptX Low Latency for two Headphones. Support OPT, RCA, AUX or USB audio output ports.

Wireless audio streaming

Bluetooth-enable your TV, AV Receiver, PC/Laptop or other favorite device and wirelessly stream to your headphones/speakers!

No more delay

Featuring aptX Low Latency technology, Audikast Plus allows you to reduce Bluetooth delay- delivering high quality sound in perfect synchronization. Pair with your favorite pair of headphones also equipped with aptX Low Latency technology.

Wide compatibility

Compatible with 99% of TV's on the market, our Audikast Plus supports Optical / AUX / RCA audio output and PC USB output without extra wires to get in your way.

Direct volume control

For your convenience, easily adjust volume via physical +/- buttons specially designed for earphones without volume controls.

User friendly interface

Clearly visible status indicators allow you to see when device is in pairing mode, when it's connected and what type of codec is in use. Independent buttons for handling 2 device connections allows for easy and intuitive control. On board volume adjust function can be used for many devices which do not have their own volume controls.
