aptX HD Bluetooth Headset with Smart Noise Canceling Microphone for Clear Calls, Supported Wireless Headphone & Headset 2-in-1, Wire & Wireless

Plug & Go, Universally Compatible

Purchased a different USB dongle and had to go through some complicated driver installation process? No worries, the Alto Clair 2 wireless set does NOT require any driver; simply plug the adapter into your device's USB port, power the headphones on and go. It works with any Windows, Mac and Linux PC that inputs/outputs audio through USB port.

Filter Out the Environmental Noise

The Avantree Alto Clair 2 is your perfect remote working companion; Skype, Zoom, Microsoft Teams, Google Meet, and even Clubhouse, the Alto Clair 2 headphone's smart noise filtering algorithm effectively "filters out" the environmental noise caught by the mic, so your voice can always be heard loud and clear by everyone else that's on the call.

Stable & Reliable Signal Quality

The Avantree Alto Clair 2 uses Bluetooth v5.0, ensuring stable & reliable connectivity up to 33 ft (10 m) between the dongle & the headphone. Need to grab a drink from the fridge or take a bathroom break? No problem, do what you need to do, the connection will not break. Note: Actual range can be affected by both physical & wireless interference.

Know what you Sound Like

Not sure if other people/attendents on the call can hear your voice properly? That's alright; the "Sidetone" feature of Alto Clair 2 headphone lets you hear your own voice through the microphone WHILE you're speaking, so you'd know instantly if you accidentally muted yourself or if your voice is not loud or clear enough.

Simultaneously Connect PC & Phone

Have the headphones connect to your Phone AND the Adapter simultaneously. Want to listen to something on your PC but don't want to miss an important call on your phone? Not to worry, the "Multi-Point Connection" feature of Avantree Clair 2 will auto-switch onto your mobile device when a call comes in, so you'll never miss anything.

Use it as an aptX-HD Music Headphone

The headphone in Alto Clair 2 set can be used independently. Easily remove the detachable mic, pair the headphone with your phone and enjoy a Hi-Def music session on your way to work. When a call comes in, simply plug the mic back, click the convenient "pick-up" button on the headphone, and speak away. Don't even need to take your phone out!

Convenient Charging & Storage

The battery of the Alto Clair 2 headphones can last up to 16 hours per full charge, more than enough for a full day of usage. When you do need to charge it, simply place it back onto the charging stand, it'll be charged and ready in a couple of hours. The stand also dubs as perfect storage solution, helping you save some extra space on your workstation.

Lighter & More Comfortable

The Avantree Alto Clair 2 headphone only weighs ~5.5 oz /150g - much lighter than other meeting/call headphones on the market (usually more than 8 oz/220 g), which means that there'll be significantly less pressure on your head. What's more, the protein leather earpads are so soft that you'll forget that they're there.

Optional Wired Use

If you prefer, the Alto Clair 2 can also be used as a wired headset. Simply plug the headset into your computer using the included 3.5mm AUX Audio cable and you will be ready to go. NOTE: During wired use, the buttons for Mute / Pause / Volume Up & Down on the headset will not function due to the nature of wired transmission - only the audio and boom microphone will function. However, easily use your computer controls to adjust volume / mute / play / pause.

Comparison Chart

Take a look at how the Alto Clair 2 differs from some of our other headset/headphones (Alto Solo, [Alto Clair](#)) to help ensure you purchase the correct one for your needs.

What's in the box
