- < איכות שמע מעולה וצליל נקי
- < התחברות והשמעה ממגוון מוצרי שמע
- < ללא השהייה בין תמונה לשמע
- < **מאריך טווח - עד 50 מטר**
- < לחצנים שימושיים - בקרת עוצמת שמע

Type: Long Range Bluetooth 5.0 Transmitter for TV - **Orbit Producer:** Avantree **Color:** Black **Overview:**

The Orbit is designed to enhance your TV listening experience. Multi-room coverage ensures connectivity around the house. The LCD interface makes it incredibly easy to use and the mic input support enables it to work even if your TV audio ports are inaccessible or unavailable.

Multi-room coverage

Experience wireless freedom around the house! With two long range internal antennae, the Orbit can reach a range of up to 164' in open line-of-sight conditions and up to 50-70' indoors.

NOTE: Operation range can be affected by physical obstructions and wireless interference.

Easy to use

The LCD display shows you all headphones/speakers available for connection. Just choose the one you want to connect to the Orbit - no guesswork required. The intelligent interface also clearly indicates your device pairing status, connection status, active codec and whether the signal from your TV is a valid audio source. On board volume controls also allow you to adjust the volume on your headphones - especially useful for devices which do not have their own volume controls.

Netflix, Amazon Prime compatible

The Orbit is compatible with Netflix, Amazon Prime, Hulu and other streaming services, delivering high-quality audio to your headphones/speakers for a great, cinematic experience right at home.

Ideal for watching TV/Movies

Featuring aptX Low Latency technology, the Orbit reduces streaming delay and ensures your audio is in perfect synchronization with your TV. Enjoy watching your TV programs without any audio delay or lip sync error. Pair with your favorite pair of headphones which are also equipped with aptX Low Latency technology.

Audio from BOTH sound bar and headphones

Even if your TV has only one optical port, just connect the Orbit between your TV and Sound-bar. Audio can play from your sound-bar and stream to your headphones simultaneously. This is a unique industry feature!

Works with all TVs

Whether you're watching your favorite show on your new TV or your old one, the Orbit can work with it. It's universally compatible with any TV that has optical audio output ports, and TVs with inaccessible or unavailable audio ports.

Mic input support

So...your TV doesn't have any suitable audio ports or they're just too hard to reach? Not to worry! The Orbit even supports a mic input - this means even if your TV audio ports are inaccessible or unavailable, the Orbit can still pick up the audio from the TV's external speakers and stream the audio to your headphones.

Complementing your lifestyle

In addition to its stand-out features, the Orbit also breaks the mould with its simple and iconic design language. Bucking the trend of many stereotypical "box-like" transmitters, the Orbit's smooth surfaces and basic geometrical shape will blend in harmoniously with your modern home décor.
