

Remote Cable Tester

מק"ט: HP-TESTER

תיאור המוצר

Description:

Most cost saving solution of MIS

The remote Cable Tester is palm-sized unit with four different testing ports: RJ-45, RJ-11 USB and BNC, for the testing of today's most popular media.

This Unit can be used to verify the condition of cables, both before and after their installation.

The passive module can be separated for testing the remote end of installed network cabling.

One button testing offers easy operation and multiple LEDs give clear testing results. The unit will also automatically shut off when not in use.

Detachable module for testing two remote points

Features:

Open / Short wiring test.

Connected wires display.

Crossover wiring display.

Visible LED status display.

Equipped with RJ-45 and RJ-11 ports both with 50μ gold plating.

Maximum cable length 300ft.
