

Bluetooth Headphones & Transmitter Stand - Set for TV

מק"ט: AV-BTHT-6190-BLK1

תיאור המוצר

שם מוצר: סט אוזניות אלחוטיות עם מעמד מתאם בלוטוס למחשב ולטלוויזיה

יצרן: Avantree (אוונטרי)

צבע: שחור

מידע נוסף:

- < גרסת בלוטוס מתקדמת - 5.0V
- < איכות שמע מעולה וצליל נקי

עוצמת שמע מוגברת <
מאריך טווח - עד 45 מטר! <
סוללה חזקה - עד 35 שעות ניגון מוזיקה ! <
ללא השהייה בין תמונה לשמע <
ניתן לחבר לכל סוגי הטלוויזיות <
התקנה פשוטה - ללא צורך בדרייברים <

Type: Universally Compatible Low Latency Wireless Headphones for TV & Transmitter Set with Charging Dock

Producer: Avantree

Color: Black

Overview:

The Avantree Opera is the ideal Bluetooth transmitter and over-ear headphone set. It comes pre-paired from the factory, is low latency certified, can work simultaneously with a sound bar or AVR, allows two headphones connection, all to help you get the most out of your TV viewing experience.

Works with ANY TV on the Market

Thanks to Opera's Optical, AUX, and RCA input cables, almost every TV on the market is covered. What really sets it apart is the Mic in feature that lets you connect to ANY TV (includes non-smart and non-Bluetooth TVs) and enjoy the audio wirelessly. The Mic in function is incredibly convenient when the TV audio ports are hard to reach, for example, when mounted.

NOTE: The wired microphone is not included in the Opera's packaging.
Please contact support@avantree.com for a free wired microphone if needed.

Hassle-Free Pairing & Set Up

Opera's Bluetooth headphone and transmitter are factory pre-paired so there's no need for you to go through the complex and painful Bluetooth pairing procedure. Simply connect the transmitter base to TV, power both the headphone AND the transmitter on, they'll connect with each other automatically and you'll be good to go! Quick and easy!

Perfectly Synced, No Lip-Sync Delay

Certified Low Latency Bluetooth, the Opera provides <40 ms audio latency - significantly lower and better than the 200+ ms of typical Bluetooth solutions on the market. This feature effectively solves the notorious lip-sync delay issue of Bluetooth technology and guarantees perfectly synchronized visual & audio no matter what you're watching.

Two Headphones, at the Same Time

The transmitter base in Avantree Opera allows you to add a second pair of headphones so you can enjoy a nice Netflix/HBO movie night with a partner. This dual link feature goes even further to permit independent volume adjustment on either headphone so you AND your partner can each enjoy the movies at your preferred volume level.

Works Alongside your External Speaker

The "Bypass" or "Pass-through" feature of Avantree Opera allows the headphone + transmitter set to work ALONGSIDE your existing soundbar or stereo AV receiver AT THE SAME TIME. This is perfect for group settings - The headphone user will be able to listen to the TV at his/her own volume while the others can hear directly through the sound bar & speaker system.

Stay Connected, Never Miss a Thing

Equipped with Bluetooth v5.0 and the highest Bluetooth range, Class 1, wireless headphones for TV Opera ensures stable & reliable connectivity of up to 164 ft (50 m, barring any excessive physical/wireless interference). Need to start making dinner or grab a drink

from the fridge? No problem, move around the house and do what you need to do without worrying about the audio cutting out.

Transmitter & Charging Dock, 2-in-1

The headphone battery can run up to 35 hours per full charge – more than enough for a full day of binge-watching. When the battery is low, the transmitter base doubles as a charging dock; simply place the headphone onto the charging dock, it'll start charging and be ready again within 1.5 hours. The headphone can also be charged using a 5V/2.5A USB Type-C cable.

Works Independently, Too

Want to use the Opera Bluetooth headphone with your phone? Sure thing! The Bluetooth 5.0 headphone in the Opera combo can work by itself too. Pair the headphone directly to your mobile device and play away. The headphone itself is designed with precision-engineered 40mm stereo drivers, delivering powerful yet steady audio quality while ensuring smooth & dynamic listening experience.

Study, Durable yet Comfortable

The Opera headphones is lightweight & flexible; it comes in at 8oz (~230g) compared to the 10+ oz (290+ g) of its competitors. This, combined with the soft memory foam earpads and the adjustable headband, will be able to provide you with immense comfort even after a full day of use. The headphone is built with sturdy material that can withstand years of wear & tear.

EQ Adjustment to Enhance the Experience

Enhance and emphasize specific sounds of the audio for your favorite TV programs. The Wireless headphones for TV features 2 EQ presets to enhance your TV listening experience. Choose from 2 different equalizer presets to emphasize speech or music for a balanced sound.
