מק"ט: AV-BTCK-12

תיאור המוצר

שם מוצר: דיבורית בלוטוס לרכב עם משדר רדיו
יצרן: Avantree (אוונטרי)
צבע: שחור

Type: Bluetooth Car Speakerphone with FM Transmitter - Roadtrip **Producer:** Avantree **Color:** Black **Overview:**

The latest Bluetooth hands-free, visor-mounted car kit has enhanced HiFi sound with powerful dual 3W speakers. Features one-button access to Siri or Google Assistant, FM transmitter, Automatic power on/off with noise reduction technology, volume control, mute button, and an omni-directional microphone for call clarity on both ends.

HiFi Sound Dual 3W Speakers

Despite its compact design, the Roadtrip is packed with two internal 3-watt speakers. Unlike other Bluetooth car speakers on the market, the powerful dual 3W multimedia speakers provide high fidelity sharp sound quality and louder call volume so you can hear voice from a phone call over ambient background noise.

Crystal Clear Calls

The powerful 3-watt dual speakers enables you to always hear your conversations clearly and the built-in dual microphone with noise reduction technology provides the ultimate call clarity for both call and caller – whether you are dealing with freeway or traffic noises.

Auto Power On / Off

For your ultimate convenience, when you leave the car and your Bluetooth device disconnects from the Roadtrip, it is designed to automatically power off. Upon returning to your car, the Roadtrip will automatically connect to your device as you open the door and the motion sensors activate.

FM Transmitter

For cars without Bluetooth or when you do not have radio reception during roadtrips. You can wirelessly stream music, audiobooks or phone calls from your smartphone to your car stereo using a vacant FM radio station channel. The Roadtrip built-in mic comes with echo reduction to help when you are talking.

Multipoint Connection

Connect up to two phones in the same car to the Roadtrip and have the ability to take phone calls from either. So whichever phone receives the latest incoming phone call, you will be able to answer that call by using the Roadtrip speakerphone. Also, you have the ability to connect two phones so you can use the FM transmitter and stream two different playlists.

Easy to Use

Easy setup and simple controls. Use the rotary dial to adjust volume levels or press it like a button to enable the MUTE function. Press the white phone icon button to enable Siri or Google Assistant on your phone to make phone calls, send texts, mute or get driving directions. The visor mount holds the Roadtrip speakerphone at the ideal position while driving.
