- < לחצנים שימושיים - בקרת עוצמת שמע

**Type:** Audikast 3 - Bluetooth 5.3 audio transmitter for TV Audio with aptX Adaptive **Producer:** Avantree **Color:** Black **Overview:**

**WIDE COMPATIBILITY**

The Audikast supports TVs with optical (TOSLINK) and AUX (3.5mm) audio output ports. Please check your TV's audio output options before purchase to ensure compatibility. With this product, you can connect Bluetooth headphones or earbuds to the transmitter and enjoy audio from your TV wirelessly.

### **BOOSTED VOLUMES**

Transmitters connected via optical sometimes suffer from low volumes that cannot be adjusted; the Audikast 3 is one of the only transmitters on the market that alleviates this by boosting the volume of optical connections by up to 6dB.

### **POWERED BY QUALCOMM**

With its advanced Qualcomm chipset, the Audikast 3 delivers clearer sound, stable connections, and improved battery life for connected devices – all backed by Avantree's 20+ years of Bluetooth expertise.

### **NO LIP-SYNC DELAYS**

Get perfectly synced audio and visuals when you pair the Audikast 3 with compatible aptX-Adaptive or Low Latency-supporting headphones, such as the Aria Me or Audition 3.

### **DUAL LINK**

Pair your Audikast 3 with two pairs of headphones simultaneously and share your enjoyment with your loved one.

### **EXTENDED RANGE**

Class 1 Bluetooth offers a reliable connection within a 100ft / 30m radius.

### **Specifications:**

- Bluetooth Version v5.3
- Bluetooth Chipset QCC3056
- Supported Audio Codecs aptX-Adaptive, aptX, SBC
