

CAT5e FTP Cross-over Cable

מק"ט: CAT5E-CROSS

תיאור המוצר

כבלי רשת תקשורת מגשרים מוצלבים בצבע אפור בהיר בקטגוריית CAT5e לחיבור קווי ויציב לרשת. כבלי רשת המשמשים בעיקר למכשור ומכונות תעשייתיות.

Description:

Crossover cables should only be used for direct network connections. Attempting to connect a computer to an old router or network switch with a crossover cable instead of a normal cable, can prevent the link from functioning.

These cables can be specially purchased through various electronics outlets.

A straight-through cable can be relatively quickly converted into a crossover cable by removing

the connector and reattaching the wires with the appropriate transmit and receive wires crossed.

Specification:

- CAT5e FTP crossover Cable with moulded connectors
- Foil twisted pair (FTP) shielded network cable to reduce interference.
- Suitable direct network connections
- RJ45 network plug each end
- Color: Light grey
- Lengths: 2m, 5m, 10m
